目 次

No. 1	Trade of Asia and Oceania for the year 1928 (第一表) 一九二八年極東諸國ノ貿易	1
No. 2	Japan's Position in the Trade of Asia and Oceania (第二表) 極東諸國貿易ニ於ケル日本ノ地位	2
No. 3	Amount of Trade Per Head of Population (1928) (第三表) 極東諸國一人當貿易額(一九二八年)	3
No. 4	Imports of Merchandise into Japan by Continents and Countries (第四表) 日本輸入貿易相手國別表	4
No. 5	Exports of Merchandise from Japan by Continents and Countries (第五表) 日本輸出貿易相手國別表	5
No. 6	Major Imports of Japan and Countries of Origin (第六表) 日本重要輸入品國別表	6
No. 7	Major Exports of Japan and Countries of Destination (第七表) 日本重要輸出品國別表	8
No. 8	Imports of Merchandise into China by Continents and Countries (第八表) 中華民國輸入貿易相手國別表	10
No. 9	Exports of Merchandise from China by Continents and Countries (第九表) 中華民國輸出貿易相手國別表	11
No. 10	Major Imports of China and Countries of Origin (第一〇表) 中華民國重要輸入品國別表	12
No. 11	Major Exports of China and Countries of Destination (第一一表) 中華民國重要輸出品國別表	14
No. 12	Imports of Merchandise into Dutch India by Continents and Countries (第一二表) 蘭領印度輸入貿易相手國別表	16
No. 13	Exports of Merchandise from Dutch India by Continents and Countries (第一三表) 蘭領印度輸出貿易相手國別表	17
No. 14	Major Imports of Dutch India and Countries of Origin (第一四表) 蘭領印度重要輸入品國別表	18
No. 15	Major Exports of Dutch India and Countries of Destination (第一五表) 蘭領印度重要輸出品國別表	20
No. 16	Imports of Merchandise into Philippines by Continents and Countries (第一六表) 比律賓輸入貿易相手國別表	22

No. 17 Exports of Merchandise from Philippines by Continents and Countries (第一七表) 比律賓輸出貿易相手國別表	23
No. 18 Major Imports of Philippines and Countries of Origin (第一八表) 比律賓重要輸入品國別表	24
No. 19 Major Exports of Philippines and Countries of Destination (第一九表) 比律賓重要輸出品國別表	26
No. 20 Imports of Merchandise into Siam by Continents and Countries (第二〇表) 暹羅輸入貿易相手國別表	28
No. 21 Exports of Merchandise from Siam by Continents and Countries (第二一表) 暹羅輸出貿易相手國別表	29
No. 22 Major Imports of Siam and Countries of Origin (第二二表) 暹羅重要輸入品國別表	30
No. 23 Major Exports of Siam and Countries of Destination (第二三表) 暹羅重要輸出品國別表	31
No. 24 Imports and Exports of Merchandise into/from French Indo-China by Continents and Countries (第二四表) 佛領印度支那輸出入貿易相手國別表	32
No. 25 Major Imports and Exports of French Indo-China and Countries of Origin and Destination (第二五表) 佛領印度支那重要輸出入品國別表	33
No. 26 Imports of Merchandise into British Malaya by Continents and Countries (第二六表) 英領馬來輸入貿易相手國別表	35
No. 27 Exports of Merchandise from British Malaya by Continents and Countries (第二七表) 英領馬來輸出貿易相手國別表	36
No. 28 Major Imports of British Malaya and Countries of Origin (第二八表) 英領馬來重要輸入品國別表	37
No. 29 Major Exports of British Malaya and Countries of Destination (第二九表) 英領馬來重要輸出品國別表	38
No. 30 Imports of Merchandise into British India by Continents and Countries (第三〇表) 英領印度輸入貿易相手國別表	40
No. 31 Exports of Merchandise from British India by Continents and Countries (第三一表) 英領印度輸出貿易相手國別表	41
No. 32 Major Imports of British India and Countries of Origin (第三二表) 英領印度重要輸入品國別表	42
No. 33 Major Exports of British India and Countries of Destination (第三三表) 英領印度重要輸出品國別表	44

No. 34 Imports of Merchandise into Ceylon by Continents and Countries (第三四表) 錫蘭輸入貿易相手國別表	46
No. 35 Exports of Merchandise from Ceylon by Continents and Countries (第三五表) 錫蘭輸出貿易相手國別表	47
No. 36 Major Imports and Exports of Ceylon and Countries of Origin and of Destination (第三六表) 錫蘭重要輸出入品國別表	48
No. 37 Imports of Merchandise into Australia by Continents and Countries (第三七表) 濠洲輸入貿易相手國別表	49
No. 38 Exports of Merchandise from Australia by Continents and Countries (第三八表) 濠洲輸出貿易相手國別表	50
No. 39 Major Imports of Australia and Countries of Origin (第三九表) 濠洲重要輸入品國別表	51
No. 40 Major Exports of Australia and Countries of Destination (第四〇表) 濠洲重要輸出品國別表	53
No. 41 Imports of Merchandise into New Zealand by Continents and Countries (第四一表) 新西蘭輸入貿易相手國別表	55
No. 42 Exports of Merchandise from New Zealand by Continents and Countries (第四二表) 新西蘭輸出貿易相手國別表	56
No. 43 Major Imports of New Zealand and Countries of Origin (第四三表) 新西蘭重要輸入品國別表	57
No. 44 Major Exports of New Zealand and Countries of Destination (第四四表) 新西蘭重要輸出品國別表	58
No. 45 Pacific and Atlantic Trade as viewed from U. S. A. (第四五表) 合衆國ヨリ見タル太平洋貿易ト大西洋貿易	59
No. 46 Percentage of value of Chief Commodities Exported from Far Eastern Countries with Proportion to Total Exports (第四六表) 極東諸國重要輸出品ノ總輸出高ニ對スル割合	90
No. 47 Prices of Chief Agricultural Products (第四七表) 重要農產品價格	61
No. 48 Present Status of Transportations of the Far East (1923) (第四八表) 極東諸國交通運輸ノ現勢(一九二八年現在)	62

CHAMBER OF COMMERCE OF THE UNITED STATES OF AMERICA

WASHINGTON

October 3, 1930.

Office of the President

Hon. Manzo Kushida, President,
National Committee for Japan,
International Chamber of Commerce,
Marunouchi, Tokyo.

Dear Sir:-

As you know, the Sixth Biennial Congress of the International Chamber of Commerce will be held in Washington, D.C., May 4 to 9, 1931. All sessions of the Congress will be held in the headquarters of the Chamber of Commerce of the United States, and the latter organization, jointly with the American Committee of the International Chamber of Commerce, will act as hosts to the visiting delegates from foreign countries participating in the Congress.

In the week previous the Nineteenth Annual Meeting of the Chamber of Commerce of the United States will be held in Atlantic City, N.J., April 28 to May 1, 1931. There will be in attendance at this meeting business men from all parts of the United States representing most lines of business, industrial and financial endeavor.

It gives us great pleasure on behalf of the Officers and Members of the Board of Directors of the Chamber of Commerce of the United States to extend to you, and through you, to the members of your delegation who will participate in the Biennial Congress of the International Chamber of Commerce, a most cordial invitation to attend any or all of the sessions of the annual meeting of the Chamber of Commerce of the United States. We believe that your delegates who may be able to arrive in the United States sufficiently in advance of the International Congress to permit of their attendance at the sessions of our annual meeting would be afforded a good opportunity to confer not only with business men in their own lines of business, but to come in contact with representative business men from both the large and small communities of the United States.

^x Please be assured that we should be glad of an opportunity to extend a most hearty welcome to your representatives.

Hoping you will give this invitation your most careful consideration, and looking forward with much pleasure to receiving your acceptance, indicating those who will attend we are

Yours sincerely,

Wm. BUTTERWORTH (Signed)
President.

D. A. SKINNER (Signed) JULIUS H. BARNES (Signed)
Secretary. Chairman of the Board.

INTERNATIONAL CHAMBER OF COMMERCE

Document No. 4302
Nov. 6, 1930

XXXIVTH MEETING OF THE COUNCIL

December 5, 1930

B. FINAL PROGRAMME OF THE WASHINGTON CONGRESS

The draft provisional programme prepared for the Washington Congress by the Committee on Preparation of the Congress, is attached and submitted for the consideration of the Programme Committee and the Council

As will be seen, this draft provides for two questions of a general order, instead of one, i.e. under the general heading

INTERNATIONAL ECONOMIC RELATIONS

the two following general questions:

Europe/United States (three plenary sessions, two for discussion and one for discussion and decision)

The new commercial policies and the principles of the International Chamber of Commerce (two plenary sessions, one for discussion and one for decision)

There would be no group meetings for these general questions Europe/United States, and New Commercial Policies: the consensus of opinion being that group meetings dealing with such general subjects attract all the delegates, and really become plenary sessions, so that the plenary sessions that follow are deprived of interest. However these plenary sessions would be prepared at private meetings.

As regards the Europe/United States question, it will be desirable to arrive at some striking formula that would obviate the assumption of economic antagonism between the two Continents.

The Committee was insistent that in addition to the Europe/United States problem, the question of New Commercial Policies ought to be made the subject of detailed preparatory inquiry before the Washington Congress, whatever the special questions chosen, whether for instance, the most favoured nation clause, indirect protection, marks of origin, etc. Such detailed inquiry is all the more necessary as the International Chamber will have to present a report on the subject to the Economic Consultative Committee of the League of Nations, that meets in Geneva in May 1931.

Should the existing economic crisis still continue in May 1931, it will doubtless be necessary that the International Chamber should devote a plenary session to this subject.

As regards International Fairs, it was decided that the question would merely be submitted to the Congress for information if the official International Commission, that is to meet in December reaches the same conclusion as the Committee of the International Chamber, if however, there is a divergence between the views of the official Commission and those of the Committee of the International Chamber, the question will have to be discussed by the Congress.

As regards International Telephone Service, the expansion of person to person calls merely appears as an indication, and other

matters concerning international telephons service may be considered in Wahsington.

It was also decided that questions not appearing on the Group agendas, but that have been the subject of inquiry by Committees, such as South America and International Industrial Ententes, may be made the subject of Resolutions at the Congress, on condition that the latter are approved by the Committee on Resolutions it being understood that the number of Resolutions to be submitted to the Congress without having been approved by a group, will be restricted to a minimum.

At the suggestion of the Bureau of the Budget Committee, the Executive Committee decided that all delegates sending in their names for the Washington Congress would be asked to pay the sum of £2 (two pounds sterling) as a contribution towards the extraordinary expenses of this Congress. This practice is not new in international organizations, and is current in the United States. This amount is small in comparison to the cost of the journey.

AN OUTLINE
OF THE
PRESENT ECONOMIC CONDITIONS IN JAPAN

I. - THE PRESENT STATUS OF ECONOMIC CONDITIONS IN JAPAN.

A General Outline of the Economic World.

The Japanese economic world, which in general greatly expanded during the World War and during the several years immediately following it, was first visited in the reactionary period by the great catastrophe of earthquake and fire and then by the financial panic, and before the damage was repaired it received a twofold blow from the world economic depression since late 1929 and the removal of the embargo on gold in January, 1930 and thus fell into the present conditions of depression. Both domestic and foreign demands for products diminished and at present there is a great overproduction in agriculture as well as in manufacturing industry; notwithstanding the recent counter measures such as restriction of productions, marketing agreements or the carrying of the surplus stock of rice and raw silk, the principal Japanese products, the degree of the fall of general prices in Japan was greater than in other countries. Looking at this in the index number of wholesale prices, taking those of June, 1929 as 100, we find the figures for December, 1930 to be 74.9 for London and 75.8 for New York as against 72.5 in Tokyo. Comparing the prices of rice and raw silk in the later part of 1930 with those of the later part of 1929, the former had as great a fall as 35% and the latter 46%. It goes without saying that such a violent fall of prices as this is strongly affecting the economic world in every direction.

The index number of wages in November, 1930, with the wages of June, 1929 as 100, was 95 and compared to general prices it was still high. While this is a factor that prevents a violent fall of purchasing power it is acting as a cause of decline of production, because it makes it impossible to reduce the cost of production in accordance with the fall of prices.

(A) Manufacturing Industry.

Cotton Industry.

The number of spindles at the end of July last was 7,072,000 producing in 1930 about 1,000,000,000 lbs. of cotton yarn.

The output of cotton textiles in the same year returned at about 2,600,000,000 yards for broad width goods, about 1,433,000,000 yards for narrow width ones. This output fell off by 10%, 5% and 12% respectively as compared with the previous year. Although no reliable reports are as yet obtained with regard to the total amount of value, the index of prices shows fall of 27% in cotton yarn and the prices of cotton textiles went down accordingly.

Silk Reeling Industry.

The production of raw silk increases year after year and in 1929 it reached 93,162,000 lbs. which was double the amount produced ten years ago and 65% of the world's total production of raw silk. In the reeling industry, adjustment of production to meet the rise or fall of demand cannot be made as the production of cocoons, the raw material for reeling, is a subsidiary work of farmers. Thus export to America having dropped 18% in quantity during the year just passed, the stock in hand reached such a great figure as 13,764,000 lbs., and consequently the fall of price was very severe, the price at the end of 1930 being almost half that of the same period in 1929.

Other manufacturing Industries.

Although there is a noteworthy advancement in the scale and construction of the manufacturing industries of cement, paper (especially news print paper), sugar and others, they could not escape the effect of the depression and many establishments are curtailing operations as shown in the following list.

The Rate of Curtailment of Operations in the Principal Manufacturing Industries.

(February, 1931)

Cotton textile mills	34.4%
Paper manufacturing	35.0% to 50.0%
Cement	53.2%
Fertilizer (Superphosphate)	55.0%
Iron and steel	50.0% to 60%
Artificial silk	10.0%

(B) Commerce.

The Condition of Domestic Commerce.

With the decline of general purchasing power the quantity of consumption of commodities diminished and business is dull. Judging

from the movement of railway freight of the whole country, the consumption in 1930 was 17% less than that of the preceding year. Again, the stock in warehouses in 1929 showed the tendency of gradual increase while in 1930 there was a tendency to diminish.

Foreign Trade.

Looking at recent trade conditions in terms of value as found in the list following, we see a sudden decrease in 1930 both in exports and imports by about 30%. This fall in value is principally attributable to the fall of prices in the world in general and in Japan. As to the quantity of trade I have not yet any reliable material to make use of, but looking at important articles there is some decrease in export, 18% in raw silk being the greatest, followed by goods connected with textiles. Imports also fell a little, the greatest being 11% decrease of raw cotton, followed by other raw materials. For years Japan has been confronted with a shortage of food, clothes and the yearly imports of necessaries of life reach several hundred million yen, the amount of import of food stuffs alone being from ¥150,000,000 to ¥200,000,000. The principal cause of the excess of imports over exports year after year is this want of necessaries of life.

Comparative List of Japanese Trade in 1929-1930.

(excluding Korea and Formosa.)

	Amount of Export	Amount of Import
1929	¥2,149,000,000	¥2,216,000,000
1930	1,470,000,000	1,546,000,000
Amount decreased	679,000,000	670,000,000
Percentage of decrease	32%	30%

(C) Finance and Money Market.

Financial Policy.

The present Government discarded the usual policy of supplementing deficit by the floatation of loan and, solely adhering to retrenchment policy, is trying to make the budget properly balance and is doing its utmost to make the established policy thorough-going.

Money Market.

The removal of the embargo on gold brought and excess of exports of gold over imports in 1930 to about ¥236,000,000. But the credits previously set up abroad in anticipation of outflow of specie to foreign countries were left untouched.

The outflow of gold, however, naturally lowered the amount of specie reserve in the central bank and as the consequence diminished the issue of convertible notes. But the financial depression lessened the demand for capital and money market became inactive, and in October, 1930 the central bank lowered the official discount rate from 5.48% to 5.11%.

(D) Communications.

Transportation by Land.

The greater part of railways in Japan belongs to the state. The total mileage is about 20,000 kilometers which is twice as great compared with the figure for 1913, the year preceding the outbreak of the Great War. A thing to be noted in railway is the tendency of electrification of the lines as the result of the growth of electric industry. In recent years the use of motor-car is spreading throughout the country and, taking the place of construction of railways, motor-car is fast becoming an important factor in local transportation.

Marine Transportation.

According to the statistics of June, 1930 the vessels in Japan comprises about 4 million tons of steamers and about 400,000 tons of motor ships and of recent years the excess of tonnage is great. In the immediate past there was a tendency that the rate of increase of motor vessels was greater than that of steamships.

(E) Agriculture.

The principal product of Japanese agriculture is rice, and sericulture is the principal side line of farmers.

In rice farming Japan shows a success of intensive method of farming rarely seen elsewhere in the world. The rate of crops gradually increased through the improvement of the method of cultivation and the advancement of utilisation of fertilizer. Like wheat in Europe and America, the successive good harvest of rice in the last two years resulted in an overproduction of rice and the price fell violently. With the fall of price of raw silk the price of cocoons also had a heavy fall and prices of other agricultural products followed them. The degree of the fall of prices of agricultural products exceeded the fall of the prices of commodities needed in agricultural districts which, aggravated by the return to farms of a great number of unemployed men, intensified the pain of farmers and greatly diminished the purchasing power of the people.

(F) Labour.

The development of Japanese manufacturing industry is still behind the leading countries of the Occident. The total number of employee in this field is less than 5,000,000 of the total population of 64,000,000 (exclusive of Korea and Formosa) and the greater part of the remainder are engaged in agriculture. Again majority of the last mentioned are tenants whom we cannot count among the so-called wage earners.

While the problem of unemployment is universal, the number of unemployed in Japan also increased, and although the exact number is not known, 370,000 is estimated to be the minimum.

Recently the movement for labour union is growing, and although the number of union members is only 7% of the total number of employee, labour troubles are gradually increasing. At the same time tenants' trouble are frequent in agriculture and both are stirring up troubles everywhere through the influence of radical thoughts.

II. A. - THE CAUSES OF THE DEPRESSION UNIVERSALLY
RECOGNIZED AS IMPORTANT.

- a. Overproductions, especially overproductions of raw materials and food stuffs.
- b. The fall of the price of silver.
- c. The dumping by Soviet Republic in the world's markets.

B. - OTHER ITEMS THAN THOSE MENTIONED IN "A" WHICH
ARE ALSO RECOGNIZED AS IMPORTANT.

- a. The world's maldistribution of gold and the retrenchment policy of the major countries.
- b. High customs duties and other commercial obstacles.
- c. Political and social unrest in China and India.
- d. The burden of the people of the countries concerned in paying the war reparations and war debts.

III. - TO WHAT EXTENT DID THOSE CAUSES OF DEPRESSIONS
MENTIONED ABOVE AFFECT JAPAN.

The causes enumerated in "II" above (including A and B) un-

doubtedly brought depressions directly or indirectly to all the countries of the world. But of all these, what influenced Japan most were the fall of the price of silver, high tariff of various countries and the political and social unrest in China and India. In addition to these external causes there were internal circumstances which aggravated the depression in which adjustment process in various quarters took place in order to accommodate for the removal of embargo on gold. The real conditions and the degree of the depression were briefly stated in the various items under I above.

IV. A. - CONCERNING RECOVERY OR AGGRAVATION OF FINANCIAL FUNCTIONS IN JAPAN.

We cannot observe any symptoms that indicate further aggravation of economic depression in Japan, nor can we predict its improvement. After all the future of Japanese economic world will, beyond question, depend upon the return of economic prosperity of America and other countries in the world and it is expected to recover gradually with the stabilization of national conditions in China and India.

B. - THE CONDITION OF STOCKS OF MANUFACTURED ARTICLES.

The stocks of manufactured articles in Japan show a tendency of gradual decrease caused by the policy of restriction of productions and other reasons.

V. A. - COUNTER MEASURES AGAINST THE DEPRESSIONS IN JAPAN.

- a. Encouragement of the policy of industrial rationalization.
- b. To endeavour for the realisation of equilibrium between cost of production and prices of commodities.
- c. To readjust national finance to domestic economic conditions.
- d. To take measures of fostering industries of the country and to improve conditions of the balance of trade.

B. - THE INTERNATIONAL COUNTER-MEASURE AGAINST THE DEPRESSION.

- a. International cooperation concerning stabilization of the price of silver and correction of maldistribution of gold.
- b. Each country to lower the tariff as much as possible and to endeavour in eliminating other commercial obstacles.

March, 1931.

華府總會ニ於ケル演說案

私ニ與ヘラレタル演說ノ題目ハ、「極東ヨリ觀タル世界貿易」ト云フノテアルカ、私ハ日本代表テアルカラ、日本ニ重點ヲ置イテ世界貿易ノ發達ニ關スル卑見ノ概要ヲ述ヘテ見タイト思フ。

(未定稿)

International Chamber of Commerce
Japanese National Committee

" THE WORLD TRADE VIEWED FROM THE FAR EAST "

Speech
to be delivered by
Mr. K. Kagami, Japanese Delegate
at the Washington Congress of the I.C.C.
May 4th 1931.

"The World Trade viewed from the Far East" is the subject of my address, which has been assigned to me. As I represent Japan on this occasion, I shall make special references to Japan in presenting my humble views regarding the progress of the world trade.

The term "Far East" is often used in various senses without definite conception. By the Far East some people mean east of Suez, while others who use the term in a broader sense would comprise Australia and New Zealand. According to a definition more generally accepted, the term Far East covers the countries situated east of Singapore. It is in this sense that I speak of the Far East in my address. Surveying the economic structures prevailing in various countries of the Far East, I find that these are principally countries producing raw materials. Compared with other countries of the Far East, Japan is an industrial nation a little more advanced. But raw silk, which is one of her staple exports, is a semi-raw material, so to speak. From now on, Japan will have to concentrate her energy on the development of such lines of textile industry as raw silk, silk fabrics, cotton yarn and cotton fabrics.

Such being the position of Japan, let us make a survey of the rôle which Japan is playing now in the eastern trade. In Japan's trade with China, we find in the statistics for 1929, that of China's aggregate imports amounting to 1,281,000,000 taels, approximately 26 per cent is represented by the Japanese goods. But Japan's commercial relations with other nations of Asia, Australia, New Zealand, etc. have not yet shown sufficient progress. Japanese goods exported to these countries are in the neighborhood of 10 per cent of foreign goods imported into these countries. I wish to point out therefore that it is important for Japan to expand her foreign trade in this direction. It is also Japan's ambition to do so. It is needless to state that there is ample room for trade expansion in the Asiatic markets for all other nations of the world engaged in foreign trade. With reference to population and the volume of trade per capita, the combined population of Asia, Australia and New Zealand represents approximately one half of the aggregate population of the whole world, which is 1,962,000,000 according to the investigation made by the League of Nations in 1928. Let us compare the volume of trade per capita for 1928 on the basis of population as estimated above. In Asia and Australia, the average export per capita is \$5.63 U.S. currency, and the average import per capita is \$5.16. Compared with the per capita average for the aggregate population of the world, which is estimated at \$16.43 for export and \$17.57 for import, the figures for Asia and Australia represent approximately one third. If we take this fact into consideration, we will see that for the trade of Asiatic countries there is ample room for future development. The

figures cited above indicate on the other hand that the purchasing power of Asiatic countries is still poor. I am therefore of the opinion that our Asiatic countries will have to increase purchasing power either by raising the price of raw materials produced or by increasing the amount of sales.

Turning to the foreign trade of Japan, let me quote from the statistics for 1930, which is the latest one available. Exports: ¥1,470,000,000. Imports: ¥1,546,000,000. Total: ¥3,016,000,000. Imports exceed exports usually in the foreign trade of Japan. But a closer study of various nations with which Japan has trade relations reveals the fact that exports exceed imports in her trade with U.S.A., China, Dutch Indies, the Phillipines, France, Central America, South America, Africa, etc. Imports exceed exports every year in Japan's trade with Kwantung Leased Territory, British India, Australia, Great Britain, Germany, etc. If Japan cannot export more than she imports, she has at least to maintain an equilibrium of imports and exports. It is for this reason that Japan is endeavoring to promote her export trade. But a preferential tariff has recently been arranged between British India and Great Britain. British India has also adopted a tariff so high that it is particularly a menace to Japan in her export trade of cotton goods. I may mention a prohibitive import tariff applied by French Indo-China to goods that come from countries without treaty relations. In the United States, the revised tariff for higher duty took effect in June last year, while in China the tariff has recently been revised to introduce a uniform increase of the rate. I wish to point out that all these measures not only deal

a severe blow to Japan's foreign trade, but also constitute a serious obstacle interfering with the mutual interests of all nations of the world. The general situation of the world is such that Japan too has to maintain a tariff barrier, but each nation ought to realize the importance of economic inter-dependence and to endeavor more than ever in order to materialize such fundamental principles as the freedom and equitable treatment of commerce, which the International Chamber of Commerce has been upholding.

Referring to the economic depression from which all nations are suffering, I find that, in addition to its being due to the world depression, each nation has its own causes of the trouble. Inasmuch as the economic depression prevailing in Japan is, broadly speaking, a reflection of the world depression, it will be necessary to analyze the various facts which brought about the world depression in order that we may inquire into the causes of depression in Japan and find the way out of it. In this connection let me refer you to a report addressed to President Taeunis by the Japanese National Committee of the International Chamber of Commerce. As stated in that report, we consider the following the most important causes of the world-wide depression. Overproduction of raw materials and foodstuffs in all countries; the policy of dumping adopted by Soviet Russia; the preponderance of gold reserve in some countries; high tariffs enforced by all countries; the financial burdens borne by the nations concerned on account of the reparations and war debts; the political unrest prevailing in China and India; the low value

of silver. Of all these causes, the low value of silver, the high tariffs of all nations, and the political unrest prevailing in China and India affect Japan more than anything else. I shall make further reference later to the low value of silver, which is an economic problem of world-wide importance.

As to the question whether the economic situation in Japan will improve in the near future or will take a worse turn, I do not find any indications for a situation worse than the present. But on the other hand there is not a definite prospect of improvement. After all, the economic future of Japan depends upon restored prosperity in America and other countries of the world. As China and India recover from political unrest, the economic situation in Japan will gradually improve. Particularly in Japan it is firmly believed that the political stabilization and economic prosperity of her neighbor China constitute one of the most important requirements for the improvement of the world's economic situation. It is therefore earnestly hoped in Japan that China may speedily adopt a united regime and that laws and other institutions may be properly organized. It is also hoped that China's inexhaustible natural resources may be properly developed, thereby promoting her commerce with other nations.

Let me now turn to the silver question. The recent fall of silver has dealt a severe blow not only to silver-producing countries but also to silver-standard countries and those exporting their goods to silver-standard countries. It is a well-known fact that the low value

of silver is an important cause of the world-wide depression. I understand that intensive inquiries into the causes of depression and into the best way of coping with the situation have been made in many directions. Of the various measures adopted for maintaining the value of silver, I may mention the proposals for international loan, for a world-wide agreement not to sell silver, for recommending to postpone the disposal of silver, for raising the purity of silver coins, for establishing the relative value of gold and silver. There are several more proposals and recommendations, but most of them are intended to relieve the producers of silver who are in urgent need of help. Some measures which merely render temporary assistance may ultimately prove instrumental in contributing to a further fall of silver. Some proposals are criticized for not taking into consideration the national and financial condition of a country, on whose behalf any recommendation is specially made. Unfortunately, none of these proposals seems to have a definite prospect of realization.

The slump in the silver market may be traced to the following causes: (1) The adoption of a kind of gold standard in India, French Indo-China and Persia, which has decreased the demand of silver for coinage. (2) The sale of silver which has become useless for coinage in these countries. (3) The difficulty of controlling the production of silver as by-product. (4) The fact that silver as merchandise shares the world-wide decline of prices. If I am not mistaken in this view of situation, then any one of these causes is such that it is impossible for a single

nation to solve the silver problem of the present day. It will readily be seen that the only way to solve the problem successfully is to depend on international cooperation. It is for this reason that nothing has yet been done by us in regard to the representation to the Japanese Government as it was requested by the Headquarters of the International Chamber of Commerce in accordance with the resolution adopted on February 20th by the Executive Committee in Paris. Should any suitable measure for coping with the situation be adopted at the present gathering, Japan would be ready to cooperate with other nations in carrying out the measure. It should however be noted that no matter what measure may be adopted, it will have to be carried out cautiously and promptly. Nothing could be worse the wanton circulation of groundless rumors, which would only serve to make silver fluctuate incessantly.

As stated at the outset of my address, the economic progress of the Far East depends on the development of natural resources and the uplifting of standard of living. It is therefore highly desirable that the leading nations of Europe and America should render assistance in various ways in order to realize this hope. You will note that anything accomplished along these lines will contribute to the progress of the world trade. The most efficient way to insure a satisfactory progress of the commerce and communication between one nation and another engaged in the world trade will be to exchange visits among all nations as frequently as possible. One nation will thus be able to observe the actual condition of another, and more friendly contacts will prove educational

to all concerned. For the progress of communication among the nations of the world, I believe that it is essential to improve the shipping service and to reduce the cable charges. I may state here that the rate of foreign telegrams which Japan is paying now are unfairly high. If the foreign trade of all nations can thus enjoy unhindered development, then production and consumption will naturally adjust themselves all over the world. It is my sincere hope that we may hereafter be able to continue to make our best endeavors working along the lines as outlined above.
